

The chart displays two time series, blue and red, plotted against a date axis from February to December. The y-axis ranges from 0 to 2. The blue series starts at approximately 1.2 in February, decreases to a minimum of about 0.1 in June, then rises sharply to a peak of about 1.8 in late December. The red series starts at approximately 1.0 in February, decreases to a minimum of about 0.1 in June, then rises to a peak of about 0.8 in late December. Both series show significant volatility, particularly in the latter half of the year. The blue series has a very sharp spike in late December, reaching a value above 1.8. The red series also shows a sharp spike in late December, reaching a value above 0.8. The confidence intervals for both series are wide, especially for the blue series in the latter half of the year.
