

The graph displays two time series, one in blue and one in red, plotted against a date axis. The x-axis is labeled 'Date' and has major ticks for 'Sep 01', 'Dec 01', 'Mar 01', and 'Jun 01'. The y-axis is unlabeled but has a grid. The blue series is a solid line, and the red series is a dotted line. Both series show a general upward trend from September to March, followed by a sharp decline and then a very sharp spike at the end of the period. The blue series reaches a higher peak than the red series at the end of the period.
