

The figure displays the daily number of deaths in the United Kingdom from August 30 to October 25, 2020. The x-axis represents the date, and the y-axis represents the number of deaths. The plot includes observed data points (black dots), a fitted model line (solid black), and a shaded blue region representing the uncertainty interval. The data shows a peak in late August/early September followed by a decline and then a period of relative stability with some fluctuations. The uncertainty interval is wider in the later part of the period shown.

Date	Observed Deaths	Fitted Model	Lower Bound (Uncertainty)	Upper Bound (Uncertainty)
Aug 30	~100	~100	~80	~120
Sep 06	~100	~100	~80	~120
Sep 13	~100	~100	~80	~120
Sep 20	~100	~100	~80	~120
Sep 27	~100	~100	~80	~120
Oct 04	-	~100	~80	~120
Oct 11	-	~100	~80	~120
Oct 18	-	~100	~80	~120
Oct 25	-	~100	~80	~120
