

The chart displays the daily number of COVID-19 cases (blue line) and deaths (red line) in France from February 1, 2020, to December 31, 2020. The x-axis is labeled 'Date' and includes major ticks for Mar 01, Jun 01, Sep 01, and Dec 01. The y-axis represents the number of cases and deaths, with a grid extending to 100,000. The blue line shows a significant increase starting in November, peaking at approximately 80,000 cases in early December. The red line shows a corresponding increase in deaths, peaking at approximately 1,500 deaths in early December. Both lines show a sharp decline following the peak in December.
