

The graph displays two time series over a period from approximately February to November. The x-axis is labeled 'Date' and has major ticks for Feb 01, May 01, Aug 01, and Nov 01. The y-axis has major ticks at 0, 1, 2, and 3. The red series (solid line) starts at approximately 0.8, drops to a minimum of about 0.2 in late February, then rises to a peak of about 0.9 in late April. It then drops to a minimum of about 0.1 in late June, rises to a peak of about 0.7 in late August, and finally rises sharply to a peak of about 1.0 in late October. The blue series (solid line) starts at approximately 0.3, drops to a minimum of about 0.1 in late February, then rises to a peak of about 0.6 in late April. It then drops to a minimum of about 0.1 in late June, rises to a peak of about 0.6 in late August, and finally rises sharply to a peak of about 1.4 in late October. Both series show significant fluctuations and a sharp increase in late October/early November. The red series is generally higher than the blue series, with both showing significant fluctuations and a sharp increase in late October/early November.
